WORK EXPERIENCE (2 YEARS)

FREECHARGE PAYMENT TECHNOLOGY (AXIS BANK) MUMBAI, INDIA

Sep 2022 – July 2023

Software Development Engineer

- Contributed to **Axis Bank Bill Pay**, an online payment platform enabling users to conveniently pay their utility bills using **React and Typescript**.
- Developed and implemented a **Cashback module** across multiple billing categories, rewarding users with cashback upon completion of specific transaction milestones.
- Worked on implementing **scheduled payment functionality** that adjusts the payment amount based on the user's payment behavior.
- Built **Cashback Module Complaint Portal** from scratch, providing user-friendly platform for registering complaints related to cashback concerns using **React and Material UI**.

SCRIPTSHUB TECHNOLOGIES PRIVATE LIMITED PUNE, INDIA

July 2021 – Sep 2022

Associate Software Development Engineer

- Engaged in a project focused on **Home Healing services**, contributing to the development of both the web application and mobile application.
- Accountable for the maintenance, coding, debugging, and testing of the web application.
- Enhanced the user interface, resulting in a faster and more efficient experience for clients, utilizing **React and Ant Design**.
- Single-handedly created the entire user interface for a **Billing Utility Web application**.

LANGUAGES AND TECHNOLOGIES

- **Programming Languages:** Javascript(EsNext), Typescript, HTML5, CSS3
- **Frameworks and Tools:** React, Redux-Toolkit, Firebase, Figma, TailwindCss, Chakra UI
- **Others:** GitHub, Jira

PERSONAL PROJECT

Netflix-GPT: Built a Netflix-like streaming platform with **react-redux**, integrating **firebase** for user authentication and **openAI GPT-3.5 API** for movie recommendations.
